

### **3<sup>rd</sup> IFSTP Symposium - Cambridge, August 16-19, 1998**

1. Gulezian D. Jacobson-Kram D. McCullough CB. Olson H. Recio L. Robinson D. Storer R. Tennant R. Ward JM. Neumann DA. Use of transgenic animals for carcinogenicity testing: considerations and implications for risk assessment. [Review] [146 refs] Abbreviated Source  
Toxicol Pathol. 28(3):482-99, 2000 May-Jun.
2. Descotes J. Choquet-Kastylevsky G. Van Ganse E. Vial T. Responses of the immune system to injury. [Review] [16 refs] Abbreviated Source  
Toxicol Pathol. 28(3):479-81, 2000 May-Jun.
3. Hinton DM. US FDA "Redbook II" immunotoxicity testing guidelines and research in immunotoxicity evaluations of food chemicals and new food proteins. Abbreviated Source  
Toxicol Pathol. 28(3):467-78, 2000 May-Jun.
4. Kuper CF. Harleman JH. Richter-Reichelm HB. Vos JG. Histopathologic approaches to detect changes indicative of immunotoxicity. [Review] [44 refs] Abbreviated Source  
Toxicol Pathol. 28(3):454-66, 2000 May-Jun.
5. Maronpot RR. The use of genetically modified animals in carcinogenicity bioassays. [Review] [4 refs] Abbreviated Source  
Toxicol Pathol. 28(3):450-3, 2000 May-Jun.
6. Mahler JF. The use of genetically altered animals in toxicology. [Review] [22 refs] Abbreviated Source  
Toxicol Pathol. 28(3):447-9, 2000 May-Jun.
7. Foster JR. Cell death and cell proliferation in the control of normal and neoplastic tissue growth. [Review] [38 refs] Abbreviated Source  
Toxicol Pathol. 28(3):441-6, 2000 May-Jun.
8. Fenner-Crisp PA. Endocrine modulators: risk characterization and assessment. [Review] [0 refs] Abbreviated Source  
Toxicol Pathol. 28(3):438-40, 2000 May-Jun.
9. Ashby J. Validation of in vitro and in vivo methods for assessing endocrine disrupting chemicals. [Review] [36 refs] Abbreviated Source  
Toxicol Pathol. 28(3):432-7, 2000 May-Jun.
10. Nilsson R. Endocrine modulators in the food chain and environment. [Review] [77 refs] Abbreviated Source  
Toxicol Pathol. 28(3):420-31, 2000 May-Jun.
11. Kennedy S. Endocrine disruptors: overview and a pathologist's perspective. [Review] [8 refs] Abbreviated Source  
Toxicol Pathol. 28(3):418-9, 2000 May-Jun.
12. Iatropoulos MJ. An introduction to endocrine modulators. [Review] [28 refs] Abbreviated Source

Toxicol Pathol. 28(3):415-7, 2000 May-Jun.

13. Povey AC. DNA adducts: endogenous and induced. [Review] [83 refs]  
Abbreviated Source  
Toxicol Pathol. 28(3):405-14, 2000 May-Jun.

14. Morelli MA. Industry viewpoint on thresholds for genotoxic carcinogens.  
[Review] [27 refs] Abbreviated Source  
Toxicol Pathol. 28(3):396-404, 2000 May-Jun.

15. Williams GM. Iatropoulos MJ. Jeffrey AM. Mechanistic basis for  
nonlinearities and thresholds in rat liver carcinogenesis by the DNA-reactive  
carcinogens 2-acetylaminofluorene and diethylnitrosamine. Abbreviated Source  
Toxicol Pathol. 28(3):388-95, 2000 May-Jun.

16. Oesch F. Herrero ME. Hengstler JG. Lohmann M. Arand M. Metabolic  
detoxification: implications for thresholds. [Review] [18 refs] Abbreviated  
Source  
Toxicol Pathol. 28(3):382-7, 2000 May-Jun.

17. O'Connor PJ. Manning FC. Gordon AT. Billett MA. Cooper DP. Elder RH.  
Margison GP. DNA repair: kinetics and thresholds. [Review] [48 refs] Abbreviated  
Source  
Toxicol Pathol. 28(3):375-81, 2000 May-Jun.

18. Tryphonas L. Gopinath C. A synopsis of the Third International Federation  
of Societies of Toxicologic Pathologists conference. Abbreviated Source  
Toxicol Pathol. 28(3):370-4, 2000 May-Jun.
